Interface and nora – your single source providers

Interface Inc. is a global flooring solutions company based in Atlanta, USA. Interface specialises in CO₂-neutral modular carpet tiles, resilient floor coverings including luxury vinyl tiles (LVT) and, since 2018, rubber floorings by nora. This wide range of products offers you the unique opportunity to cover every single area of your building from a single source.

As a market leader in the rubber flooring segment, nora develops and produces unique, premium-quality flooring solutions under the brand name nora by Interface. Architects, principals, end users and installers around the world trust nora rubber flooring solutions for creating healthy living environments and aesthetically pleasing interiors.

nora uses a cutting-edge manufacturing process to produce rubber floorings that combine premium quality with a unique aesthetic and a wide range of functional properties. Different applications place different aesthetic and technical requirements on floorings. nora offers a large selection of floorings to fulfil these requirements and cover every area of your building.

Interface and nora will find the perfect solution for any room and any requirements, from classrooms and conference rooms to retail spaces and public areas, from stairways to laboratories and operating theatres.

Innovative PVC-free rubber floor coverings

nora floor coverings are made by combining high-quality natural and industrial rubber with naturally sourced minerals and colour pigments. The natural rubber used is PEFC certified which means it is officially sourced from sustainably managed forests and harvested under humane working conditions. nora rubber floor coverings are also free from PVC, other halogenated polymers and phthalate plasticizers.

The heat and pressure of the sophisticated vulcanisation process gives nora floor coverings a dense, non-porous surface that maintains its unique functionality and aesthetic for decades. nora floor coverings also offer excellent ergonomic properties and reduce footfall sound for a pleasant acoustic environment. They are easy to clean and meet a wide range of slip-resistance requirements for various applications as well as the strictest fire protection criteria (in accordance with DIN EN 13501).

The flooring portfolio is complemented by a comprehensive range of accessories and unparalleled service, which allows consistent, cross-functional designs for any surface, stairway or building area.

nora rubber floor coverings can be found in a large scope of building types worldwide. The following segments are especially well-represented: Healthcare, Education, Transportation, Industry & Life Sciences, Public Buildings, and Shops & Stores.

Carbon Neutral Enterprise

Interface® is a carbon neutral enterprise with carbon neutral products. These credentials are third-party-certified in accordance with the recognised PAS 2060 standard. This means that we have balanced greenhouse gas emissions throughout our entire enterprise, including all business activities and our entire value chain. This important milestone makes Interface the first and only floor covering manufacturer to achieve carbon neutrality from Scope 1 to 3.

To achieve this, we first measured the carbon emissions of everything we do across our operations and entire value chain. We then focused on reducing our impact through product and manufacturing innovation, something we have a history of doing and will continue to do for decades to come. Finally, we offset the remaining emissions with verified emissions credits, resulting in an absolute balance between the carbon we emit and the offsets we retire. Our target is to become a carbon negative enterprise by 2040.

Carbon Neutral Floors

Like all Interface floor coverings, nora rubber floor coverings are also carbon neutral. This unique holistic approach goes beyond the assessment of greenhouse gas emissions from production and takes into account the entire product life cycle. We can also provide you with a certificate to prove the nora floor coverings in your building are carbon neutral. You can find out more about our third-party-certified Carbon Neutral Floors programme at www.nora.com/carbonneutral.

The circular economy

We are constantly striving to reduce the environmental impact of our products over their entire life cycle. We try to achieve circularity by reusing and recycling materials wherever possible in order to minimize the negative effects of the product life cycle on the environment and human health.

Building and corporate certifications, memberships and cooperation agreements

We take our responsibilities towards the environment and society extremely seriously. Various independent facilities have confirmed this to us in the form of different certificates and awards, not just in Germany but in other countries as well.

Sustainability criteria are becoming more and more important in the realisation of building concepts. In public procurement law they are often mandatory for the tender and decisive for the award of a contract. nora can help you score at green building rating systems.

Building certifications

nora® rubber floor coverings, nora® accessories, and nora® installation materials can enhance the sustainability properties of buildings for DGNB (German Sustainable Building Council), LEED (Leadership in Energy and Environmental Design), BREEAM (BRE Environmental Assessment Method), and other certifications.

www.dgnb.de/en/
www.usgbc.org/leed
www.breeam.com/

Memberships and corporate certifications

At nora systems, the production methods and all raw materials are subject to high ecological standards, and nora® products are internationally certified and regularly tested by independent institutes.

In the field of the environment and sustainability, nora systems is one of the leading companies in its sector and is among the initiators of the German Sustainable Building Council (DGNB) and a member of the U.S. Green Building Council (USGBC). nora was the first resilient floor covering manufacturer to publish Environmental Product Declarations (EPDs), and nora was also one of the first resilient flooring manufacturers to receive ISO 14001 certification for our environmental management systems.

Furthermore, nora is the first rubber flooring manufacturer to be awarded with the PEFC certification. All natural rubber we use in our products as a core component comes from ecologically, economically and socially sustainably managed rubber plantations.

Research and innovation are important parts of nora's corporate policy. For this reason, the "German Stiflverband" awarded nora the seal "Innovative through Research", which honours researching companies for the special responsibility they assume for the state and society.

Certified: DIN EN ISO 14001,
DIN EN ISO 50001

Eco-labels, approvals and Environmental Product Declarations

www.blauer-engel.de/uz120

The Blue Angel

One of the world's most famous and oldest eco-label, initiated by the Cabinet of Germany. This guarantees that products fulfil particularly stringent environmental, health, and performance requirements, including emission and constituent specifications.

Approval criteria: DE-UZ 120

Cradle to Cradle

Cradle to Cradle Certified® is awarded by the Cradle to Cradle Products Innovation Institute and is the world's most advanced science-based, multi-attribute certification program for designing, making and verifying materials and products that are safe, circular and responsibly made. Cradle to Cradle Certified® products are awarded certification based upon their performance across five critical areas of sustainability: Material Health, Product Circularity, Clean Air & Climate Protection, Water & Soil Stewardship, and Social Fairness.

Approval criteria: Cradle to Cradle Certified® Products Program

Greenguard Gold

Greenguard Gold Certification promotes the protection and safety of sensitive persons in regards to indoor air quality. Certified products fulfil stringent emission standards, affording an invaluable contribution to the quality of indoor air.

Approval criteria: UL 2818 Standard for Chemical Emissions for Building Materials

Austrian eco-label

The Austrian eco-label is awarded by the Austrian Ministry of Agriculture, Forestry, Environment, and Water Management. It provides information on the environmental impact of consumer goods that arises from their production, usage and disposal. Certified floor coverings exert as small an impact as possible on the environment and health over their whole life cycle.

Approval criteria: UZ 42

ecobau

The ecobau association has been promoting sustainable and healthy building in Switzerland since 2005. ecobau members include public building authorities from the federal government, cantons and cities, as well as organizations such as KBOB, CRB and educational institutions. Together they develop planning tools for ecological construction to support building authorities, planners and architects. The environmental impact of different building materials is assessed from production to disposal.

Approval criteria: Methodology building materials ecobau

M1

The Finnish test mark M1 is regarded as the highest certification for building products in the Scandinavian region. Besides stringent emission thresholds for total volatile organic compounds (TVOCs), the label also includes a sensory odour test.

Approval criteria: Classification of Indoor Climate 2018 and the Classification of Building Materials: General Instructions.

Etiquetage

In France, building products are classified according to their potential for emissions. The object is to eliminate risks to the health of persons inside the building. Approval criteria: French VOC label – Emissions dans l'air intérieur (Décret n° 2011-321)

Byggvarubedömningen

The Swedish institute Byggvarubedömningen assesses the sustainability of building products with respect to their emissions, constituents, and production process. The products are classified as "Recommended", "Accepted", or "To be Avoided". Approval criteria: Byggvarubedömningen's criteria for chemical content and life cycle aspects

Indoor Air Comfort GOLD

The Eurofins certification Indoor Air Comfort GOLD combines emissions requirements of the most important European eco-labels in one certificate. With this international label, planners, building owners and architects can specifically use products that do not compromise indoor air by giving off impurities. It means that more purposefully selected products can be used that have been certified thanks to their low emission levels and their sustainable properties.

Singapore Greenbuilding

Singapore Greenbuilding sets high standards and benchmarks for green building solutions. It certifies eco-friendly building products that are resource-efficient, potentially more economical and lower the environmental impact. This certification also considers if the product provides better indoor air quality for a healthier and more productive workplace in buildings. Products can be rated from Good to Very Good, Excellent to Leader. Approval criteria: Singapore Green Building Product Certification Scheme

Global GreenTag

Global GreenTag is a multi-criteria, green product rating and certification system. It examines the Life Cycle Assessment (LCA) of a product and assesses different benefits as for example greenhouse gas emissions, human health and ecotoxicity as well as biodiversity and resource consumption. Products are awarded on the following three levels: A, B and C. Approval criteria: GreenTag Standard v4.0

EPDs from Institut Bauen und Umwelt e.V.

EPDs (Environmental Product Declarations) are issued on the basis of international standards by the Institut Bauen und Umwelt e.V. (IBU). They document the ecological aspects of a product over its whole life cycle. An EPD is a neutral, but invaluable source of information in the choice of sustainable building products.

Explore our product lines

Together, our norament, noraplan and noracare product lines as well as our special floorings constitute an extraordinarily practical synthesis of design, functionality and environmental-friendliness. We are convinced that we have the perfect solution for our customers, whatever their needs are and whatever creative ideas they have. Over the following pages, you can find out more about our product portfolio and discover how to create visual accents with nora floor coverings and system solutions.

norament: Performance and long life for sophisticated interiors

norament floor coverings are real all-rounders. They are available as tiles and can be installed on surfaces that are subject to the most extreme levels of stress, e. g. industrial spaces. With a service life of 50 years, norament floor coverings are very robust. The product portfolio includes a range of unique designs including the classic pastille pattern (norament 926/825) and norament 926 pado, a modern take on the ancient Terrazzo technique.

noraplan: A wide range of designs and colours for unlimited creativity

noraplan floor coverings are available as both tiles and sheets. They come in a wide range of designs and colours for almost unlimited creativity. With a palette of 48 colours, noraplan signa offers the broadest shade spectrum of all nora floor coverings. These floor coverings have a service life of 30 years and can be used in an extensive scope of environments, including hospitals and educational facilities.

noracare: The 100 % recyclable floor covering solution with innovative surface technology

noracare floor coverings are available as sheets in two designs. The innovative silk-matte surface is extremely resistant and suitable for areas where there is heavy use of chemicals and disinfectants. This floor covering is very easy to clean and is fully recyclable. Residual material and offcuts can be used to produce new floor coverings in keeping with the concept of the circular economy.

Special floorings

nora has developed various special floor coverings for areas that are subject to special technical standards and requirements. There is a huge range of floorings, including acoustic floor coverings that improve footfall sound absorption by 20 dB, electrostatically dissipative and conductive floorings, as well as special solutions for ice rinks, horse stables or golf facilities.

In addition, nora offers removable floor coverings, quick installation systems, stairway solutions, a comprehensive range of flooring accessories and a wealth of installation materials.

norament® product range

norament®

norament, the classic among rubber floor coverings, represents absolute top quality and functionality. The standard square tile sizes of 1004 x 1004 mm are available in a wide range of colour and surface designs. Get to know our norament product portfolio on the following pages, and feel free to call your personal contact with any questions you may have.

One-coloured, classic round pastille.

norament® 926 · for use in extremely heavy-traffic areas

noracare™

noracare is an innovative flooring that offers ecological benefits. Its advanced surface technology allows easy maintenance while providing outstanding resistance against chemicals and disinfectants. noracare is fully recyclable and its extremely low emissions contribute towards excellent indoor air quality. This flooring is available in sheets and is suitable for heavy-traffic areas.

noracare™ seneo

Single-coloured design with iridescent marbled colour granules, which are harmoniously matched to the base colour with minimal contrast. Close up, the 24 colours of the noracare seneo colour palette create a perceptible pattern, while from a distance they appear almost uni-coloured.

nora® special floorings

nora® special floorings

We have developed our special floorings for areas subject to special technical standards and requirements. These include e.g. acoustic coverings with an impact sound improvement index of 20 dB, electrostatically dissipative or conductive qualities, or highly specialised solutions for ice rinks, golf facilities, and many more. Get to know the range of designs and variants on the following pages.

norament® 992/992 grano

For areas with extreme requirements
(e.g. ice rinks, golf clubs, animal stables, etc.).

norament 992 contains at least 11 % post-production recycled content.

nora® stairwell solutions

Individual requirements for stairwells are best fulfilled by our extensive system programme, from the tailored norament stairtread with integrated pre-shaped stair nosing, riser, and tread to individual combinations of stair angles, stair nosings, and integrated safety stripes.

Our system range is rounded off with colour-matched skirting solutions, joint-sealing compounds, hot welding rods, and installation materials.

norament® stairtreads

Pre-shaped stair coverings consisting of stair nosing, riser and tread all in one piece for straight steps with right-angled edge. For extremely heavy-traffic stairwell areas. Improves footfall sound absorption by 12 dB.

- Signal stripes uni, in widths of 2, 3, 4 or 5 cm (5 cm only available for stairtread norament® 926 arago or for stairtreads with hammerblow surface) in the colours 0122 light grey and 0895 signal yellow, integrated into the tread area. Also available in widths of 2 or 3 cm set into the vertical part of the stair nosing.
- Safety stripes ultra grip for increased slip resistance in widths of 2, 3, 4 or 5 cm (5 cm only available for stairtread norament® 926 arago or for stairtreads with hammerblow surface) in the colours 6029 yellow and 6014 grey, integrated into the tread area. Also available in widths of 2 or 3 cm set into the vertical part of the stair nosing.
- Signal stripes, yellow, phosphorescent in accordance with DIN 67510, in a width of 2 cm, integrated into the tread area of the stair nosing.

Signal and safety stripes in other widths and colours are available on request. Please ask for minimum quantities and delivery times.

Most frequently used stripe combinations

Further options are available.

nora® stair accessories

The nora accessory range is made of rubber matched to suit the respective nora floor coverings. They can also be used in combination with other types of flooring. nora profiles are impact and shock resistant and do not shrink. They contain no phthalate plasticisers and retain their functional reliability for many years.

nora® stair nosings

With plug-in lip for quick and easy installation on all types of staircases.

As a genre loose laid flooring may not be the best solution under certain conditions.

We are happy to advise you if the floor in your room is subject to:

- High or regular exposure to moisture
- High or frequently occurring dynamic pressure loads (e.g. using forklifts)
- High temperature fluctuations

Custom colours of all norament 975 LL designs are available on request. Please ask for minimum quantities and delivery times.

Product Structure

Quick installation systems

nora® nTx

nora nTx is a unique technology for the professional installation of nora rubber floor coverings. Ingeniously simple – nora nTx brings its adhesive strength along from the factory. The flooring is cleanly and safely installed in only a few steps and immediately ready for use. And this can be done on the concrete or cement screed subfloors typical in new construction, as well as over other existing floor coverings. Even high residual moisture in the subfloor is not a problem for nora nTx.

nora also offers a range of tools and installation material to ensure clean and safe substrate preparation (see page 83).

1 Subfloor 2 nora® nTx 020 (primer) 3 nora® nTx floor covering with self-adhesive back

nora® nTx consists of noraplan® and norament® standard floor coverings, which are equipped with an adhesive backing.

In addition to the products and colours shown on the following pages you can also order other norament or noraplan floor coverings as nora nTx coverings subject to minimum quantities.

nora nTx standard colour

available as nora nTx with minimum order quantity

The advantages at a glance

Reliable installation result

nora nTx reduces installation problems: no bubbles, no residual indentations, no seams. Everything from a single source; 10-year-warranty.

Immediate usability

Avoid drying and waiting times. Installation is possible during ongoing operations, and the floor can be used immediately after installation.

High efficiency

The preparation of the floor and the installation of nora nTx require only a few work steps – for more space in less time.

For all types of subfloors

nora nTx is suitable for all common types of subfloors – ideal also for problematic subfloors and underfloor heating.

Use with residual moisture

Application in new builds also possible with increased residual moisture in the subfloor.

Covering-over-covering installation

In the case of renovations, installation is possible directly over existing floor coverings in just a few steps.

Art. 181C

~1.22 m x 15.0 m

~2.1 mm

nora® profile connection dimension: A + U

Slip resistant R9

Custom colours and dimensions (e.g. short rolls) are available on request. Please ask for minimum quantities and delivery times.

With nora nTx you can **reduce installation time by up to 50%** and can even **carry out renovations during ongoing operations**.

Installation problems like bubbles, residual indentations, or seams **belong to the past**.

nora® nTx installation material

nora nTx 020 has been developed specifically for nora® nTx floor coverings. The perfect matching between the primer and the nora nTx floor coverings provides functional reliability and ensures the highest standards of quality. Moreover, nora nTx 020 can be applied to subfloors with higher residual moisture levels.

nora® nTx 020
1C primer (Bonding agent)

Art. 6684
Primer for improved adhesion
Available as 12 kg container

nora® nTx tools

nora® nTx sanding disc incl. nTx K3
Sanding disc for preparing substrates

Art. 6685
Suitable sanding discs for the machines: Mambo, Columbus, and Orkan. Already fitted with sanding tool nTx K3.
Note: Please specify the machine type in your order

nora® nTx K3
Sanding tool (fine)

Art. 6686
Sanding tool for nTx sanding disc

nora® nTx K2
Sanding tool (coarse)

Art. 6687
Sanding tool for nTx sanding disc

Sanding disc

Sanding tools

Quick installation systems nora® dry adhesives

nora® dry adhesive tapes are suitable for the permanent fixing of nora floor coverings or for the quick installation of norament stairtreads, further stairwell solutions and nora skirtings.

nora dryfix™ 750 Dry adhesive supplied in rolls

For the permanent fixing of nora floor coverings. Suitable for new builds and renovations.

Advantages: 5 times as quick, can be walked on immediately, odourless, economic, low-emission and reliable.

Art. 6556

Delivery unit: 1 roll of 30 m in one carton
(tape width 750 mm)

nora® stepfix 240 Dry adhesive supplied in rolls

For quick installation of norament stairtreads, stairwell installations with nora stair nosing T 5044 and nora® stair margin.

Art. 907

Delivery unit: 1 roll of 50 m in one carton
(tape width 240 mm)

nora dryfix™ ed Conductive dry adhesive supplied in rolls

For the permanent fixing of electrostatically dissipative or conductive nora floor coverings. Suitable for new builds, renovations and on top of existing floor coverings.

Advantages: 5 times as quick, can be walked on immediately, odourless, economic, low-emission and reliable.

Art. 6706

Delivery unit: 1 roll of 30 m in one carton
(tape width 750 mm)

nora® profix · Dry adhesive tapes

nora® profix 50

For quick installation of skirting S 1023 U.

Art. 992

Delivery unit: 4 rolls of 50 m in one carton
(tape width 50 mm)

nora® profix 90

For quick installation of skirtings S 1024 U, S 3003 as well as for pedestal formation through wall nosings (cushioned-edge profile).

Art. 993

Delivery unit: 2 rolls of 50 m in one carton
(tape width 90 mm)

nora dryfix 750 and nora dryfix ed

nora profix

Installation materials

nora® wet adhesives

High quality adhesives for the installation of nora rubber flooring.
High dimensional stability and odorless during and after the application.

nora® AC 100 Acrylic adhesive

High-quality, highly shear-resistant interior wet-bed dispersion adhesive for the installation of nora rubber flooring.

Art. 6694

Delivery unit: bucket of 14 kg

nora® PU 102 2-component polyurethane adhesive

High-quality 2-component polyurethane adhesive for gluing predominantly nora coverings.

Art. 6696

Delivery unit: bucket of 8 kg

Application of nora AC 100

nora® accessories

Accessory range made of rubber matched to suit nora floor coverings for convincing solutions both in visual and functional terms. The materials are impact and shock resistant, do not contain any phthalate plasticizers and retain their functional reliability long term.

nora® skirting and skirting angles

Easy to clean, suitable for areas with stringent hygienic requirements.

nora® special range

The special range offers profiles with different cross-sections for further applications.

Minimum order quantities on request.

The profiles shown here are examples only. Further individual designs are available on request.

nora® skirting s 3014 N

Special skirting for norament® 992
and norament® 992 grano

Art. 0734

Delivery unit: 2 m

nora® skirting s 1013 U

Skirting 10 cm high, also suitable for the use
on other floor coverings

Art. 0706

Delivery unit: in rolls of 10 m

nora® transition profile A 9013 E

For a fast and easy transition solution between two different flooring
heights, e.g. in case of floor on floor installations.
The 3.5 mm connection dimension is also adjustable to smaller heights
by cutting the profile accordingly.

Color: 0702

Art. 0804

Delivery unit: 2.5 m

nora® hot welding rod

For noraplan and noracare – available in matching colours for all floor coverings.

In general, nora floor coverings do not need to be sealed. The only exceptions are noraplan acoustic floor coverings. For our other floorings, we recommend sealing the joints when the flooring has been installed on a moisture-sensitive subfloor, in rooms with continual and intensive wet cleaning, in areas with stringent hygiene requirements, or for special requirements (e.g. in laboratories).

In operating theatres or other small surfaces where the joints of the skirtings are sealed with nora joint sealing compound, the compound can also be used for these surfaces to harmonise the installation process.

Art. 946

Round, Ø 4 mm, rolls of 100 m

nora® joint sealing compound

For all nora floor coverings

It is not generally necessary to seal nora floor coverings. The exceptions are electrostatically dissipative noraplan floorings. However, we do advise sealing the joints if the subfloor is moisture-sensitive, in rooms subject to intensive wet cleaning, or in areas with special hygiene requirements. In these cases, we recommend sealing all nora floorings.

Art. 928

300 ml cartridge

1 disposable cartridge, sufficient for 20–25 m

Please note: Joint cutter (art. no. 116950) and nora® liquid wax (art. no. 109914) may be ordered from our company.

nora® pad 3 – 17"	nora® Pad 3	Ø 431 mm	delivery unit: 1 piece in one carton
	for intensive cleaning of heavily soiled and scratched floor coverings with a single disk machine for smooth noraplan floor coverings and norament floor coverings with hammerblow or cubic structure:		

nora 4you

nora 4you provides solutions for your individual flooring needs. Flooring gives your rooms structure, personality and life. With nora 4you, you can design your rooms exactly as you want them. We offer customised solutions that make your rooms special and distinctive in a way that is important to you. Anything is possible.

Quality and functionality are crucial criteria when selecting floor coverings. With nora 4you, we go one step further and put an additional focus on design and individuality. This allows you to creatively design, structure or accentuate your surfaces with colours, patterns and inlays according to your specific requirements and ideas.

Inlays

Create inlays based on our templates or design compositions of your own imagination. At our inlay centre we can process your images, drawings or image files to create your own design. Our state-of-the-art ultrasonic cutting machine cuts almost any motif into 100% matching pieces that can be laid without sealing the joints. To guarantee easy installation, we supply inlays up to a size of 1.60 x 1.22 metres, fully assembled and ready for laying. For large-sized inlays, we provide the floor layer with detailed laying plans.

Room Inlays

Room inlays are design elements. Depending on the colour combination, design language and combination of materials, they change and shape the room. Whether used as part of a comprehensive design concept or as a decorative eye-catcher, inlays make a statement that can't be overlooked. They help give spaces a distinctive identity.

Erika-Fuchs-Haus, Schwarzenbach an der Saale, Germany

© Werner Huthmacher

Routing systems

With nora 4you, you can adapt your routing system to your individual spatial circumstances. For example, colour-coded stripes or signs in the floor help people to orientate themselves as they move through different sections or parts of the building.

In addition, nora offers a variety of inlay options for flooring or skirting boards to mark escape routes with integrated light strips or other lighting elements.

© nora

Choose from our standard symbols or design your own

nora offers you a wide range of standardised templates, which we can customise according to your requirements. In addition to our standard symbols, we will be happy to design and create individual symbols or logos to suit your specific requirements.

Planks and Tiles

Our plank and tile concept gives you almost limitless freedom to design your rooms the way you want. You can use any combination of plank or tile shapes and colours to influence the overall design of the room. The laying pattern also has a decisive influence on the sense of space. Planks enable you to create a distinctive and individual spatial effect in variants that are precisely tailored to your needs. Even with tiles, you can realise different laying patterns or set unusual accents.

Our plank formats are available with most noraplan designs. We deliver planks in your choice of colour and in five standard sizes optionally in 2 mm or 3 mm. In addition, with monochrome installations of planks or tiles, the edges can be chamfered to accentuate the plank or tile character and create an elegant joint pattern. Talk to us about your ideas and we will be happy to support you with individual planning.

Different formats for endless possibilities and individual room design.

noraplan®

~ 610 mm x 305 mm

~ 1220 mm x 405 mm

~ 610 mm x 610 mm

~ 610 mm x 205 mm

~ 1220 mm x 202.5 mm

~ 610 mm x 152.5 mm

norament®

~ 1004 mm x 1004 mm

norament® 926 arago

~ 1004 mm x 502 mm

Further plank and tile sizes are available on request. Please ask for minimum quantities.

Custom colours

With over 300 colours and shades, even our standard product programme provides outstanding choice. However, if you are looking for a different colour, we will be happy to develop an individual colour for your project. We can customise almost any colour using samples or colour codes (NCS, RAL, Pantone) and implement your wishes in the flooring. For example, you can design your entire building in one shade without compromising the functional properties of your flooring.

You can choose from different:

- base colours
- granules
- surface structures

Please ask for minimum quantities and delivery times.

Smart Navigators to the perfect floor

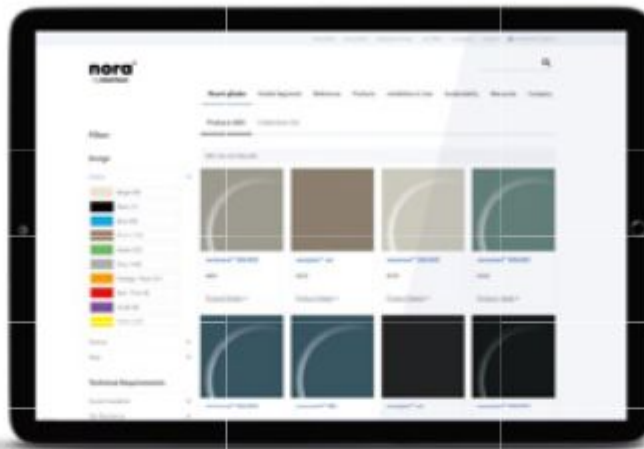

Select the floor that matches your demands

Flooring Finder

Specify the floor you need:

- select colour and design
- acoustic properties
- slip resistance
- ESD properties
- pressure load
- fire behaviour
- chemical resistance
- and more

Select the floor that matches your project's requirements

www.nora.com/flooringfinder

Experience it in your project's room

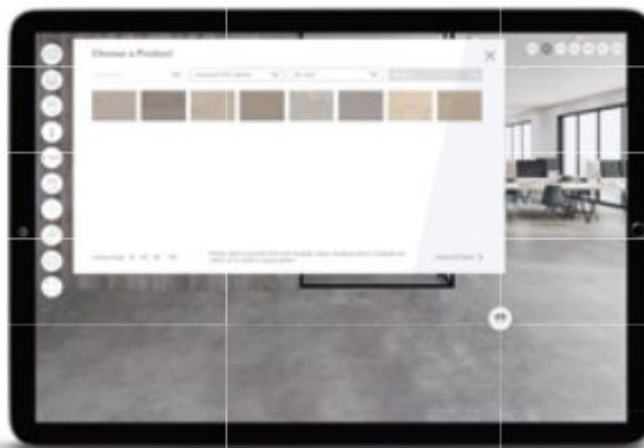

Room Designer

See how it looks in a real room:

- Use a sample room from the vast collection
- Or upload a room image from your project
- The software automatically recognizes the floor area

Print, save or share your visual experience with others.

Experience how the selected floor will look in your project

www.nora.com/roomdesigner

Building Information Modeling (BIM)

Building Information Modeling (BIM) is a software-supported method used to optimise the planning, construction and management of buildings. All relevant material and building data is digitally captured, managed, combined and cross-linked. This information can be used throughout the entire life cycle of a building, starting with the documentation of planning, through cost and project management to building operation.

We offer BIM files of the floor covering and stairtread standard portfolio for download on our website. Further information can be found at bim.nora.com.

Please note

norament®, noraplan® and noracare™ have been developed for indoor installation. nora® floor coverings are not suitable for installation in outdoor applications or in areas with constant and direct wet loads.

The particulars given in this brochure are for informational purposes only concerning the products presented. They represent descriptions or designations, but not any warranted qualities. This information cannot cover all possible service conditions which our floor coverings may encounter.

If the floor covering is going to be exposed to out-of-the-ordinary service conditions and stresses (e.g. extreme UV radiation, chemical substances or other aggressive media), please contact us for advice.

We will be pleased to supply you on request with flooring samples to enable you to carry out in-house tests. We reserve the right to alter technical values as part of an ongoing product improvement process.

This brochure as well as the pictures and illustrations it contains are subject to a copyright owned by or licensed for nora systems GmbH, Weinheim, and may be used with its previous written approval only.

The nora brand and all other registered trademarks used in this document are registered to nora systems GmbH or its affiliates or subsidiaries. Other labels used here are trademarks of their respective owners.

Produced on 100% recycled paper. Carbon neutral production with organic inks, based on renewable raw materials.
